

LiveSlideShow

LiveSlideShow is the easiest way to transform your digital photos into dazzling, powerful and professional presentations. LiveSlideShow is the most effective QuickTime presentation tool for digital images available to consumers today.

Sound and Music

LiveSlideShow's built-in voice recorder allows you to create voiceovers for each of your slides. This is perfect for adding narrative descriptions for a business presentation or for recounting your vacation.

You can easily add background music to your presentations. LiveSlideShow supports more audio formats than any other similar product so there is no need to worry if you're audio is MP3, .wav, CD, or one of the other popular formats.

Captioning

Each slide can have a text caption added to it. You can even use captions to provide a translation in a second language. For a professional touch, you can scroll the captions and add lots of common graphical text enhancements!

Publish to the Web

You don't need to know complex coding to post your slideshows to the Web. LiveSlideShow will build your Internet presentation for you automatically. It's that easy to Run Your Own Show!

With all these ways to customize your presentation, LiveSlideShow makes it easy.

Compatibility & Connectivity

Do you have digital images? LiveSlideShow works with most popular digital cameras and supports more digital image formats than any other similar product available today.

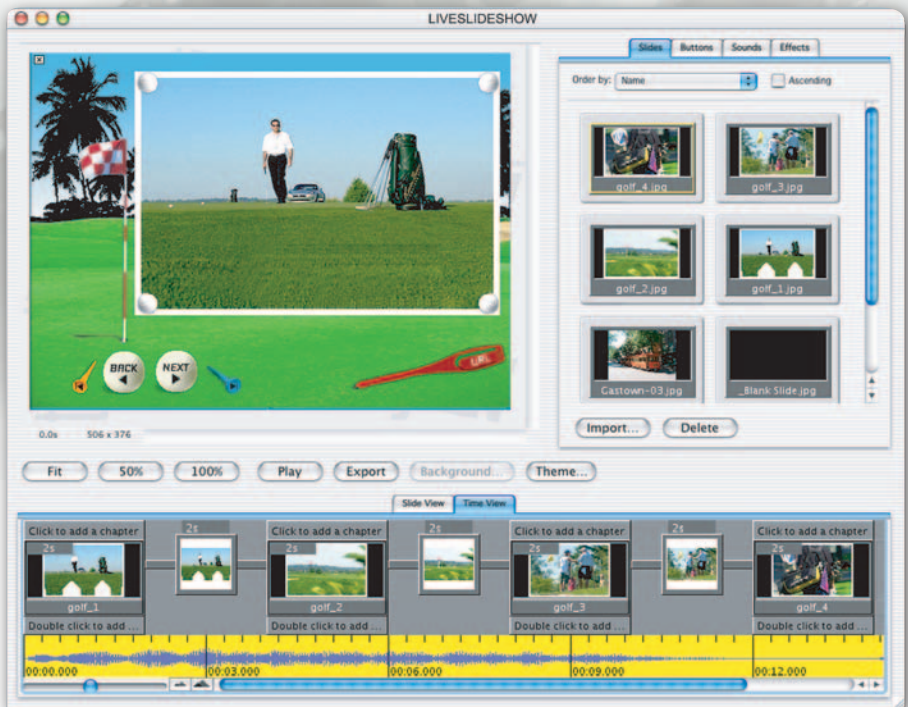

Creativity

LiveSlideShow is full of features that will help make your digital photographs sparkle. Bring your pictures to life with effects, transitions, captions, sounds and buttons that are pre-made or you can create your own. As you gain experience and your creativity grows, LiveSlideShow grows along with you.

Themes

Do you have Christmas photos? How about Wedding, Birthday, Halloween, or Vacation photos? With LiveSlideShow, you can present these photos in a unique media skin player. Download additional themes as they become available, or if you are the creative type, make your own!
